

# Hello, can you hear us?

\_ A secure and complete electronic health record communicates when you can't.

\_ Having all of your health records in one place, any time you need them, can save your life by:

- Listing all of your medications, allergies and drug interactions
- Reducing medical errors and duplication of tests
- Offering quick access to health history that could be essential in an emergency

# Could you recite your list of meds after this?

\_Accidents happen. So make sure your full health history is available any time you need it.

\_Electronic health records communicate when you can't ... and can save your life by:

- Listing all of your medications, allergies and drug interactions
- Offering quick access to your health history, including test results and prior diagnoses
- Reducing medical errors
